

What We Do at Icon Engineering

- We design fiber optic cable networks;
- We go into your neighborhoods and determine what utility infrastructure is already in place;
- · We collect data on your utility poles to see what can be safely added;
- We work with construction contractors to make sure your network is built right;
- We monitor production to ensure contractors' invoices match what is actually built.

But we do lots of other Fiber Infrastructure Things

Project consulting and Owner's Agent services

Construction typicals

- Request for Proposals for construction vendors & equipment
- Bid evaluations
